## Safe Home—Healthy Home

We are exposed to harmful chemicals in many ways—including products we use to clean our homes or maintain our gardens. Only a small portion of the more than 80,000 chemicals registered by the U.S. Environmental Protection Agency (EPA) have been thoroughly tested for human health concerns. Many common chemicals found in our homes can have immediate toxic effects on adults, children, and pets if not used properly. Others may have long-term health effects after repeated exposure. Particles from detergents, cosmetics, pesticides, and other chemicals are found in the dust in our homes, potentially contributing to

asthma.

We can make our homes safer by changing our purchasing habits, adopting some minor changes to the way we clean our homes or care for our lawns and gardens, and through proper storage, use, and disposal of household chemicals. When considering a chemical product, ask yourself if something else you already have will do the job. There are a wide variety of nontoxic or low-toxic products available. Common household items such as baking soda, vinegar, and plant-based soaps can often clean just as well as specialty cleaners.

Mercury-containing products such as thermometers, thermostats and compact fluorescent bulbs (CFLs) should never be disposed of in the trash. CFLs and other fluorescent bulbs are accepted at Lowe's, at all District transfer stations, and Greenfield Transfer Station (handle carefully and hand to attendant). Additionally, mercury-containing items and bulbs are accepted at the Regional Hazardous Waste Collection sites in Bernardston, Colrain, and Conway. At the annual Hazardous Waste Collection Day, only mercury-containing items such as thermostats and thermometers will be accepted; fluorescent bulbs are no longer accepted at the annual Hazardous Waste Collection.

Rechargeable, lithium, and button batteries are other common household items that should not be thrown in the trash. When these batteries are burned in waste combustion facilities or buried in landfills they can release mercury, cadmium or other heavy metals into the air and water, ultimately entering the food chain and posing health threats to people and the environment. Proper disposal of batteries and cell phones is free at all District transfer stations; simply hand them to the transfer station attendant. Towns that do not have transfer stations have collection boxes at town hall. Batteries are also accepted at the annual Hazardous Waste Collection Day.

*For information on alternatives to chemical products, and information about proper disposal of hazardous chemicals, mercury and sharps (needles), call (413) 772-2438 or visit [www.franklincountywastedistrict.org](http://www.franklincountywastedistrict.org). MA Relay for the hearing impaired: 711 or 1-800-439-2370 (TTY/TDD). The District is an equal opportunity provider.*
