Re: Special Permit Application Withdrawl Without Prejudice Request – Tarpon Towers & Cellco Partnership d/b/a Verizon Wireless (collectively, the “Applicants”) Special Permit Application for Proposed Wireless Communications Installation on Call Road

Dear Chair Slowinski:

The Planning Board (“Board”) is scheduled to conduct a hearing on Wednesday, March 4, 2026, regarding the above-captioned special permit application.

Due to unavoidable weather conditions and the minimal snow melt off, progress on the completion of necessary due diligence and associated filings intended for submission to the Colrain Conservation Commission have been delayed. Consequently, the Applicants recognize that there have been significant delays requiring several continuations granted by the Board relating to the above-captioned special permit application. In light of this, the Applicants respectfully request that the Board allow the Applicants to withdraw their special permit application without prejudice, with the mutual understanding that once the Applicants have concluded all matters pertaining to the project with the Colrain Conservation Commission and have finalized all necessary due diligence, the Applicants will re-submit their special permit application for consideration by the Board.

Please do not hesitate to contact me should you have any questions regarding this request.

Very truly yours,

Michael A. Fenton, Esq.
